Your problem is persist then leave a comment with full details about error. Then our team will help you.If you recognize your error then more details here. Samsung Galaxy J7 Prime SM-G610F doesn't turn on, not respond to power button (Dead/Soft Brick) Make sure a formatted SD CARD is present in the phone before proceeding to flash. After that Give up to 15mins for first boot. Finally find rom from alternative source. Read More Samsung Galaxy J7 Prime SM-G610F Doesn't not pass boot logo/bootloop After Flashing,Samsung Galaxy phone doesn't pass the boot logo that mean,there is something wrong with your Samsung Galaxy J7 Prime SM-G610F . However let it to start 15mins at least because this is first boot. After that if any problem persists then try to hard reset and do the Flash again. See More Samsung Galaxy J7 Prime SM-G610F stuck at boot/ continuously restarts/ keep rebooting First time it may give this kind of things. Wait and watch. First boot may be slow. If problem persists then try to hard reset and do the Flashing Stock firmware on Samsung Galaxy J7 Prime SM-G610F again with fresh files. See more Phone automatically disconnecting during flashing Try changing the USB-port After that run Odin FLASH TOOL as ADMIN. Make sure you have correct drivers installed - See here Finally try another PC and USB cable. USB device not recognized This is not related to Odin Flash tool. Seems like this is error of your USB port for the reason that you get this error.Then you can fix it from here Samsung Device auto restarting It may be your Samsung Galaxy case is pressing on it (Clean the power button.) Or May be, your current stock Rom is damaged or Corrupted. So you have to Install Stock Rom/custom Rom to your device. Use this post to Flash new Stock Rom. "EXT4 image error" / hidden.img.ext4 "invalid EXT4 image "which we are talking today might occur during flashing of the device can be encountered safely. Before going to deep dive into the solution of this error, let's know about this error a bit first. Because, it's always better to know what we are dealing with, before we actual start facing it ?. Read More - FIXING THE INVALID EXT4 IMAGE USING ODIN TOOL I have made a detailed tutorial for tackling this error in my previous post. Please follow the link if you are facing this issue on your device. ; Link Error showing "SW REV CHECK FAIL" on screen This error occurs when the ROM (Read only memory) is not a proper supportable one for your device or is an old version. If you have already updated to a high level of the version, then you cannot roll back to the versions below that. Just find the recent versions and for your current phone versions. Link Error displaying "secure check fail" Case 1: The cause for such errors is either the incompatible boot loader or the corrupt ROM. Better to check the ROM by the comparison of md5 signature with on some server. More details - Link Screen showing a blank white screen This might look scary but this is the easiest problem one could tackle without any difficulty. This is not actually a real problem. The phone would be completely functional but only that the display is broken. I recommend you to boot to download mode. Flash the stock firmware with Odin, Simple! More details - Link Error which displays "Nand write start fail" Solving this error in Odin tool is challenging but not complex. There are many cases why this error exists and there are various remedies to resolve it. It is mainly caused by a corrupted NAND file system. Odin usually de-compresses the writes the firmware to the device, but while doing so, the file may be over-compressed where it fails to decompress quickly throwing the time out error. Try the below mentioned solutions. More Details - Link Phone says "Could not do normal boot odin mode" This is Normal error follow this could not do normal boot odin mode Install Oreo, Marshmallow on Samsung Galaxy J7 Prime SM-G610F we know,some phones Versions still not received latest updated android. It depend on country too. imagine that you are in Singapore and you phone have nougat. But your version Thailand phone may be received Marshmallow. So, If there is available Marshmallow or Lollipop then you can also Flash it as a Stock ROM. How to revert back to the previous version of Android When you Flash new Custom Rom, If it is still testing one then you will definitely get errors.. Like Camera fail, WIFI fail, NFC,GPS fails.. So, in this situation, You have to get previous version of android OS. But is there any chance to downgrade Android lollipop to kitkat or Marshmallow to Lollipop? I would Like to say, YES YOU CAN.. you can use this post to go Back to kikat or Lollipop Can't Boot into Recovery Mode on Galaxy J7 Prime SM-G610F Turn off your phone. (If you can, then remove the battery) Power button + Volume down + Home button. If you still can't then you have to install Stock Recovery because your one may be bracked. - Flash Recovery Mode Download Country/Carrier Based Stock Rom When you go to download, their are many version for one Model. Country/Carrier, PDA, CSC, because Samsung create OS for targeting Counties (USA,US,Uk, Korea, India, Thailand, Philippine, Australia, Africa, France, Italy, Indonesia, Malaysia, China, Sri Lanka, German, Mexico, Brazil, Canada, Egypt, Bangladesh, Turkey, Poland, Netherland, Spain, Portugal, Czech republic) . These Stock firmware not difference but may be difference pre-Installed apps and Frequency. choose your Country or choose nearest country. Thank you for coming to our Page.
